CONTAINMENTS

We build containments to suit your needs, whether big or small. We use best practices and newest technologies to minimize damage to the environment.

- **Our certified containment professionals offer a wide range of solutions for every project.**
- **ESS offers customizable solutions of primary containments and can provide for the installation of secondary containment needs specific to your location.**

SOIL REMEDIATION

- Site Assessments and Reporting
- Delineation and Workplan's
- Remediation to NMOCD and BLM Standards W/ Closure Report Submittal
- Phase I and II Site Assessments
- Groundwater Investigations and Remediation
- Storm-water and Erosion Control

DIRT WORK

Battery Pad, Lease Road and Well Pad Construction or Repairs. Our staff is skilled to build or repair all of your road and pad needs.

SOIL RECLAMATION

Our team helps restore the stability of sites and functioning ecosystem through extensive soil reclamation on oil and gas fields.

We will submit all of your regulatory paperwork, so you don't have too.

ESS has the experience and ability to restore sites to the natural state it began.
